

Photos Tell Tales

We all have photos of family, friends, ancestors and partners tucked away in drawers and closets, gathering dust. Many times they will help us recall long-forgotten events that have continuing significance for us. Many times they will bring back emotions tucked away in our memories.

“Pictures often say more than words because people do not guard their body language, gestures, posture or expressions with the same vigor as their words.”

Are there people in those photos that have left unanswered questions, secrets and unexplained behavior? Do you have an ancestor that has no written history, or a “black sheep” that no one talks about? There are also people in your life that have left you a legacy by their extraordinary achievements or talents. There are family “heroes” that we should acknowledge. Each unanswered question affects and changes what we believe about ourselves and our personal history.

Now is the time you can have all those questions answered! Interpreting photos and body language, can be an extraordinary tool in the process. A psychic profile will give you an incredible amount of personal information from a photo, although the person is not present.

“Knowing your whole personal history gives you a firm foundation on which to build your future!”
